Quality early learning matters, so we're working hard to bring top quality to you and your child.

ABC Child Care is leading the way for quality early care and education in Virginia.

We care about quality.

That's why we're part of the Virginia Quality community.

Our program is going beyond state regulations in caring for and educating your child. We receive resources and support from Virginia Quality to continue on a path of continuous quality improvement.

Virginia Quality is a state-led program that supports child care and early learning programs in improving their quality so all Virginia's children can be ready for school.

Virginia Quality also provides reliable information about quality options so that families can select care according to their values and priorities.

Quality matters.

Research shows that quality child care and early learning programs positively impact children's development, resulting in more success in school and life.

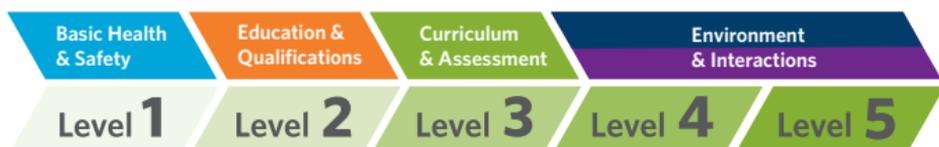

Your child's brain is built from the bottom up, with early experiences setting the stage for all later development.

The period of time from birth to five years old is a critical time for your child when **more than 700 new brain connections are formed every second!**

Here's how we shine every day.

In partnership with Virginia Quality, we're focused on top quality in areas proven to matter to children's school success.

Basic Health & Safety

Our program is in full compliance with requirements of state and local regulatory agencies.

Education & Qualifications

Our teachers have or are working towards formal education in child development or early childhood education.

Curriculum & Assessment

Our program works to incorporate curriculum, child assessment, and intentional teaching that promotes children's development and incorporates state early learning guidelines.

Environment

We strive to have children engaged in meaningful learning and play by offering them many and varied materials and activities throughout the day.

Interactions

Daily, supportive interactions between our teachers and children form the foundation for social and cognitive learning, significantly impacting school readiness.
